## Home Tech Checklist

WHERE'S MY MODEM?  
WHERE'S MY ROUTER?

Modem: \_\_\_\_\_

Router: \_\_\_\_\_

*Tip: Place your internet gateway/router in the center of the house or in the same room where school work will be done. Don't put it around other big electronic devices that could interfere with the signal.*

WHAT KIND OF ROUTER DO I HAVE?

---

---

---

*Are you using a router provided by your internet service provider? It can be better to provide your own so you can maximize effectiveness for your WIFI needs.*

HOW MANY DEVICES ARE  
USING MY WIFI?

---

*Check these devices to see if they're new or old. Using too many devices and/or using older devices at the same time can affect your WIFI connection and speed. For example, if you have an older printer connected to your WIFI while using your laptop or smartphone, the connection could be affected.*

HOW AM I CONNECTED TO  
THE INTERNET?

---

---

---

*Are your devices connected using an ethernet cable or via WIFI? Having more devices connected through ethernet takes the strain off of the WIFI signal so you can maximize its strength when you need it.*
